(54) Title: A METHOD AND APPARATUS FOR FINDING A MOBILE RADIO TERMINAL

(57) Abstract: A method and apparatus  
for finding a radio terminal (10) in a  
radio communications network. The  
method includes making observations of  
attributes of radio signals associated with  
the radio terminal (10) and generating a  
route for a seeker (20) to find the radio  
terminal (10), based on the observations  
and estimated error distributions of those  
observations. The route may be displayed  
over a topographical map to guide the  
seeker to the target.
